## **DEDICATION**

*To teachers, who make it possible to disseminate knowledge  
to enlighten the young and curious minds  
of our future generations*

*To students, who are dedicated to learning new technologies  
and making the world a better place to live in*

## **SPECIAL RECOGNITION**

*A special thanks to Mr. Denis Cadu and the ADN team of Autodesk Inc.  
for their valuable support and professional guidance to  
procure the software for writing this textbook*

## **THANKS**

*To employees of CADCIM Technologies and  
Tickoo Institute of Emerging Technologies (TIET)  
for their valuable help*

## Online Training Program Offered by CADCIM Technologies

---

*CADCIM Technologies provides effective and affordable virtual online training on various software packages including Computer Aided Design, Manufacturing and Engineering (CAD/CAM/CAE), computer programming languages, animation, architecture, and GIS. The training is delivered 'live' via Internet at any time, any place, and at any pace to individuals as well as the students of colleges, universities, and CAD/CAM/CAE training centers. The main features of this program are:*

### Training for Students and Companies in a Classroom Setting

*Highly experienced instructors and qualified Engineers at CADCIM Technologies conduct the classes under the guidance of Prof. Sham Tickoo of Purdue University Northwest, USA. This team has authored several textbooks that are rated "one of the best" in their categories and are used in various colleges, universities, and training centers in North America, Europe, and in other parts of the world.*

### Training for Individuals

*CADCIM Technologies with its cost effective and time saving initiative strives to deliver the training in the comfort of your home or work place, thereby relieving you from the hassles of traveling to training centers.*

### Training Offered on Software Packages

*CADCIM Technologies provides basic and advanced training on the following software packages:*

**CAD/CAM/CAE:** CATIA, Creo Parametric, SOLIDWORKS, Autodesk Inventor, Solid Edge, NX, AutoCAD, AutoCAD LT, Customizing AutoCAD, AutoCAD Electrical, and ANSYS

**Architecture and GIS:** Autodesk Revit (Architecture/Structure/MEP), AutoCAD Civil 3D, AutoCAD Map 3D, Autodesk Navisworks, Bentley Staad.Pro, Oracle Primavera P6, MS Project, ArcGIS, and Raster Design.

**Animation and Styling:** Autodesk 3ds Max, 3ds Max Design, Autodesk Maya, Autodesk Alias, Pixologic ZBrush, and CINEMA 4D

**Computer Programming:** C++, VB.NET, Oracle, AJAX, and Java

*For more information, please visit the following link:*

***<https://www.cadcim.com>***

#### **Note**

If you are a faculty member, you can register by clicking on the following link to access the teaching resources: ***<https://www.cadcim.com/Registration.aspx>***. The student resources are available at ***<https://www.cadcim.com>***. We also provide **Live Virtual Online Training** on various software packages. For more information, write us at ***[sales@cadcim.com](mailto:sales@cadcim.com)***.

<b>Dedication</b>	iii
<b>Preface</b>	xiii

## **Chapter 1: Introduction to Autodesk Revit 2022 for Structure**

Introduction to Autodesk Revit for Structure	1-2
Autodesk Revit as a Building Information Modeler	1-2
Basic Concepts and Principles	1-2
Understanding the Parametric Building Modeling Technology	1-4
Terms Used in Autodesk Revit for Structure	1-4
Creating a Structural Model Using Parametric Building Elements	1-6
Visibility/Graphics Overrides, Scale, and Detail Level	1-7
Extracting Project Information	1-8
Creating a Structural Drawing Set	1-8
Creating an Unusual Building Geometry	1-8
Flexibility of Creating Special Elements	1-8
Creating Structural Layouts	1-9
Working on Large Projects	1-9
Working in Large Teams and Coordinating with Consultants	1-9
Starting Autodesk Revit 2022	1-9
User Interface	1-11
Title Bar	1-12
Ribbon	1-12
Application Frame	1-14
Status Bar	1-16
View Control Bar	1-16
Options Bar	1-17
Type Selector	1-17
Drawing Area	1-17
Project Browser	1-17
Keyboard Accelerators	1-18
Properties Palette	1-18
Dialog Boxes	1-19
Multiple Document Environment	1-19
Interoperability of Autodesk Revit	1-20
Building Information Modeling and Autodesk Revit	1-21
Worksharing Using Revit Server	1-21

Autodesk Construction Cloud	New	1-22
Linking Analytical Model for Analysis		1-23
Autodesk Revit Help		1-23
Using the Revit 2022 Help		1-23
Self-Evaluation Test		1-24

## Chapter 2: Getting Started with a Structural Project

Starting a New Structural Project		2-2
Setting Project Units	Enhanced	2-3
Common Unit Type		2-4
Structural Unit Type		2-7
Structural Settings		2-9
Symbolic Representation Settings Tab		2-10
Connection Settings		2-15
Snaps Tool		2-17
Dimension Snaps Area		2-18
Object Snaps Area		2-19
Temporary Overrides Area		2-20
Options Dialog Box	Enhanced	2-20
General Tab		2-20
User Interface Tab		2-22
Graphics Tab		2-23
Hardware Tab		2-24
File Locations Tab		2-24
Rendering Tab		2-25
Check Spelling Tab		2-25
SteeringWheels Tab		2-26
ViewCube Tab		2-28
Macros Tab		2-29
Saving a Project	Enhanced	2-30
Using the Save As Tool		2-31
Using the Save Tool		2-32
Closing a Structural Project		2-33
Exiting a Structural Project		2-33
Opening an Existing Structural Project		2-33
Opening an Existing Project Using the Open Tool		2-33
Using the Windows Explorer to Open an Existing Project		2-35
Tutorial 1		2-36
Tutorial 2		2-40
Self-Evaluation Test		2-43
Review Questions		2-44
Exercise 1		2-45
Exercise 2		2-45

## Chapter 3: Setting up a Structural Project

Project Template	3-2
Creating a Custom Project Template	3-2
Settings for the Project Template	3-4
Using Levels	3-13
Understanding Controls in a Level	3-13
Adding Levels	3-14
Instance and Type Properties of a Level	3-17
Changing the Level Parameters	3-19
Controlling the Visibility of Levels	3-21
Grids <i>Enhanced</i>	3-21
Creating Grids	3-22
Creating Multi-Segmented Grids	3-27
Modifying Grids	3-28
Customizing the Grid Display	3-28
Controlling the Visibility of Grids	3-29
Working with Reference Planes	3-29
Working with Work Planes	3-30
Setting a Work Plane	3-30
Controlling the Visibility of Work Planes	3-31
Using the Workplane Viewer Window	3-31
Working with Project Views	3-31
Viewing a Building Model	3-32
Controlling the Visibility of Elements in Views	3-32
Scope Box	3-32
Creating a Scope Box	3-33
Applying a Scope Box to Datum Elements	3-33
Controlling the Visibility of a Scope Box	3-34
Tutorial 1	3-35
Tutorial 2	3-47
Self-Evaluation Test	3-59
Review Questions	3-60
Exercise 1	3-60
Exercise 2	3-62
Exercise 3	3-63

## Chapter 4: Structural Columns and Walls

Structural Columns	4-2
Types of Structural Column	4-2
Loading Structural Column Families	4-3
Adding Structural Columns to a Project	4-4
Creating Openings in Structural Columns	4-10
Modifying the Element Properties of Structural Columns	4-12
Architectural Columns	4-19
Adding Structural Column to an Architectural Column	4-20
Difference between a Structural Column and an Architectural Column	4-21

Structural Walls	4-21
Adding Structural Walls	4-21
Modifying Structural Walls	4-34
Tutorial 1	4-36
Tutorial 2	4-46
Self-Evaluation Test	4-50
Review Questions	4-51
Exercise 1	4-51
Exercise 2	4-52
Exercise 3	4-54

## Chapter 5: Foundations, Beams, Floors, and Open Web Joists

Foundations	5-2
Foundation Wall	5-2
Shallow Foundations	5-5
Structural Floors	5-21
Adding Structural Floors	5-21
Modifying Structural Floors	5-25
Adding Openings to a Structural Floor	5-26
Adding a Slab Edge to a Structural Floor	5-27
Beams	5-27
Adding Beams	5-28
Modifying Beams	5-30
Adding a Structural Beam System	5-30
Open Web Steel Joists	5-32
Adding K Series Joist System	5-32
Tutorial 1	5-34
Tutorial 2	5-47
Self-Evaluation Test	5-55
Review Questions	5-56
Exercise 1	5-56
Exercise 2	5-58
Exercise 3	5-59

## Chapter 6: Editing Tools

Selecting Elements	6-2
Selecting a Single Element	6-2
Selecting Multiple Elements	6-3
Selecting Elements Using the Advanced Selection Tools	6-5
Restoring a Selection	6-6
Selecting Elements Using the Filter Tool	6-6
The Filter Icon	6-8
Moving Structural Elements	6-8
Moving Elements by Changing Temporary Dimensions	6-8
Moving Elements By Dragging	6-8
Dragging End-joined Components	6-9

Moving Elements Using the Move Tool	6-10
Copying Structural Elements	6-11
Copying Elements Using the CTRL Key	6-11
Copying Elements Using the Copy Tool	6-12
Using the Create Similar Tool	6-13
Copying Elements Using the Clipboard	6-14
Rotating Structural Elements	6-17
Mirroring Structural Elements	6-19
Mirror - Pick Axis Tool	6-19
Mirror - Draw Axis Tool	6-20
Arraying Structural Elements	6-20
Linear Tool	6-20
Radial Tool	6-22
Resizing Elements	6-24
Pinning Elements	6-25
Aligning Elements	6-26
Steel Element Cutting Tools	6-27
Corner Cut	6-27
Cope Skew	6-28
Shorten	6-29
Contour Cut	6-29
Structural Steel Connections	6-29
Cope	6-29
Miter	6-30
Saw Cut - Flange	6-31
Saw Cut - Web	6-31
Cut Through	6-31
Cut By	6-31
Matching Type Properties	6-32
Trimming and Extending Elements	6-32
Trim/Extend to Corner Tool	6-33
Trim/Extend Single Element Tool	6-34
Trim/Extend Multiple Elements Tool	6-34
Offsetting Elements	6-35
Deleting Elements	6-37
Grouping Elements	6-37
Creating Groups by Selecting Elements	6-38
Creating Groups Using the Group Editor	6-38
Creating a Detail Group	6-38
Placing Groups	6-39
Modifying Groups	6-39
Excluding Elements from a Group	6-39
Saving and Loading Groups	6-40
Editing Elements	6-40
Applying and Removing Coping	6-40
Joining and Unjoining Elements	6-41
Splitting Face	6-42
Tutorial 1	6-44

Tutorial 2	6-49
Self-Evaluation Test	6-56
Review Questions	6-57
Exercise 1	6-58
Exercise 2	6-59
Exercise 3	6-60

## Chapter 7: Documenting Models and Creating Families

Dimensioning	<i>Enhanced</i>	7-2
Types of Dimension		7-2
Using Temporary Dimensions		7-3
Entities in a Dimension		7-4
Adding Permanent Dimensions		7-6
Modifying Dimension Parameters		7-13
Locking Permanent Dimensions		7-14
Converting Temporary Dimensions into Permanent Dimensions		7-14
Text Notes		7-15
Adding Text Notes		7-15
Editing Text Notes		7-18
Adding Tags		7-19
Tagging Elements by Category		7-20
Tagging all Elements in a View		7-22
Beam Annotations		7-24
Creating Families		7-29
Creating In-Place Families		7-30
Creating a Family Geometry in the Family Editor		7-31
Editing a Family Geometry in the Family Editor		7-38
Creating Cuts in a Family Geometry by Using the Family Editor		7-39
Tutorial 1		7-40
Tutorial 2		7-47
Tutorial 3		7-52
Tutorial 4		7-64
Self-Evaluation Test		7-73
Review Questions		7-73
Exercise 1		7-74
Exercise 2		7-75

## Chapter 8: Standard Views, Details, and Schedules

Elevation Views	8-2
Creating a Building Elevation View	8-2
Creating a Framing Elevation View	8-5
Section Views	8-6
Creating a Section View	8-7
Callout Views	8-10
Creating a Callout using Rectangular Tool	8-10
Creating a Callout using the Sketch Tool	8-11
Displaying a Callout View	8-11

Modifying the Properties of a Callout View	8-11
Creating Details in a Callout View	8-12
Drafting Details	8-13
Creating a Drafting View	8-13
Drafting a Detail	8-13
Duplicate Views	8-14
Creating a Duplicate View as a Dependent View	8-14
Graphical Column Schedules	8-15
Creating Graphical Column Schedule	8-15
Using Schedules in a Project	8-16
Generating a Schedule	8-16
Editing a Schedule	8-20
Generating the Material Takeoff Schedule	8-20
Tutorial 1	8-21
Tutorial 2	8-31
Self-Evaluation Test	8-38
Review Questions	8-38
Exercise 1	8-39
Exercise 2	8-40

Enhanced

## Chapter 9: 3D Views, Sheets, Analysis, and Reinforcements

Three-Dimensional (3D) Views	9-2
Creating Orthographic 3D Views	9-2
Creating Perspective Views	9-3
Creating 3D Section Views	9-5
Generating Shadows	9-7
Solar Study	9-8
Sheets	9-11
Adding a Drawing Sheet to a Project	9-11
Adding Views to a Drawing Sheet	9-12
Modifying a Building Model in Sheets	9-15
Adding Schedules to a Drawing Sheet	9-16
Analytical Models	9-16
Instance Parameters for an Analytical Model	9-18
Settings for an Analytical Model	9-22
Applying Loads in Analytical Model	9-25
Setting Boundary Conditions	9-32
Analytical Model Tools	9-36
Adding Reinforcements	9-40
Place Rebar Parallel to Work Plane Tool	9-40
Place Rebar Perpendicular to Cover Tool	9-42
Cover Tool	9-43
Area Tool	9-43
Path Tool	9-44
Free Form Rebar Tool	9-44
Fabric Area Tool	9-46
Fabric Sheet Tool	9-46

Enhanced

Rebar Coupler	9-47
Linking Building Models and Sharing Coordinates <i>Enhanced</i>	9-48
Linking or Importing Models	9-48
Introduction to Massing	9-50
Understanding Massing Concepts	9-50
Creating the Massing Geometry	9-51
Tutorial 1	9-53
Tutorial 2	9-61
Tutorial 3	9-68
Self-Evaluation Test	9-75
Review Questions	9-76
Exercise 1	9-77
Exercise 2	9-78

## Chapter 10: Linking Revit Model with Robot Structural Analysis

Installing Robot Structural Analysis Professional 2022	10-2
Structural Analysis Interoperability	10-2
Linking the Analytical Model for Analysis and Code Check	10-2
Structural Analysis in Autodesk Robot Structural Analysis Professional 2022	10-5
Linking Revit Files to Robot	10-6
Setting Job Preferences in Robot	10-7
Analysis in Robot	10-8
Viewing Results in Robot	10-11
Updating the Model in Revit	10-13
Tutorial 1	10-14
Self-Evaluation Test	10-23
Review Questions	10-24
Exercise 1	10-25
<b>Student Project</b>	<b>SP1</b>
<b>Index</b>	<b>I-1</b>

# Preface

---

## **Autodesk Revit 2022 for Structure**

Autodesk Revit is a Building Information Modeling software developed by Autodesk. The structural tools in Revit are primarily used in structural engineering and they help the users to design structural models using both parametric 3D modeling and 2D drafting elements. The Revit building information model comprises of a physical representation of a building which is fully associated with analytical representation. The building information model in Revit can be used for structural designing, production of drawings, coordination of the project, and also for third party structural analysis application.

The **Exploring Autodesk Revit 2022 for Structure** textbook explains the concepts and principles of Revit Structure through practical examples, tutorials, and exercises. This enables the users to harness the power of BIM with Autodesk Revit for their specific use. In this textbook, the author emphasizes on physical modeling, analytical modeling, rebar modeling, and quantity scheduling. Also, this textbook covers the various stages involved in analyzing the model in Robot Structural Analysis software. This textbook is specially meant for professionals and students in structural engineering, civil engineering, and allied fields in the building industry.

In this textbook, special emphasis has been laid on the concepts of structural modeling, which have been explained using relevant graphical examples and illustrations. The accompanying tutorials and exercises, which relate to the real world projects, help you understand the usage and abilities of the tools available in Autodesk Revit for Structure. Along with the main text, the chapters have been punctuated with tips and notes to make various concepts clear, thereby enabling you to create your own innovative projects.

As you go through this textbook, you will work on tutorials and exercises that can be used to build a complete project. Each of these tutorials and exercises, though complete in themselves, will be a step toward accomplishing the larger projects.

The main features of this textbook are as follows:

- **Project-based Approach**

The author has adopted a project-based approach and the learn-by-doing theme throughout the textbook. This approach guides the users through the process of creating the designs given in the tutorials.

- **Real-World Designs as Projects**

The author has used real-world building designs and architectural examples as projects in this textbook so that the users can correlate them to the real-time designs.

- **Tips and Notes**

Additional information related to various topics is provided to the users in the form of tips and notes.

- **Learning Objectives**

The first page of every chapter summarizes the topics that are covered in that chapter.

- **Self-Evaluation Test, Review Questions, and Exercises**

The chapter ends with Self-Evaluation Test so that the users can assess their knowledge of the chapter. The answers to Self-Evaluation Test are given at the end of the chapter. Also, the Review Questions and Exercises are given at the end of the chapters and they can be used by the instructors as test questions and exercises.

- **Heavily Illustrated Text**

The text in this book is heavily illustrated with about 200 line diagrams and screen capture images.

## Symbols Used in the Book

### Note

The author has provided additional information to the users about the topic being discussed in the form of notes.

### Tip

Special information and techniques are provided in the form of tips that help in increasing the efficiency of the users.

### New

This symbol indicates that the command or tool being discussed is new in the current release of Autodesk Revit

### Enhanced

This symbol indicates that the command or tool being discussed has been enhanced in this release.

## Formatting Conventions Used in the Textbook

Please refer to the following list for the formatting conventions used in this textbook.

- Names of tools, buttons, options, browser, palette, panels, and tabs are written in boldface. Example: The **Beam** tool, the **Modify** button, the **Structure** panel, the **Home** tab, the **Properties** palette, **Project Browser**, and so on.
- Names of dialog boxes, drop-downs, drop-down lists, list boxes, areas, edit boxes, check boxes, and radio buttons are written in boldface. Example: The **Options** dialog box, the **Column** drop-down in the **Structure** panel of the **Structure** tab, the **Name** edit box in the **Name** dialog box, the **Chain** check box in the **Options Bar**, and so on.
- Values entered in edit boxes are written in boldface. Example: Enter **4'** in the **Offset** edit box.

- Names of the files saved are italicized. Example: *c03\_Industrial-Complex\_tut2.rvt*

**Ribbon:** Modify | (Elements / Components) > Modify > Move  
**Shortcut Keys:** MV

- When you select an element or a component, a contextual tab is displayed depending upon the entity selected. In this textbook, this contextual tab is referred to as **Modify | (Elements / Components)**

## Naming Conventions Used in the Textbook

### Tool

If you click on an item in a panel of the ribbon and a command is invoked to create/edit an object or perform some action, then that item is termed as **tool**.

For example:

**Beam** tool, **Structural Column** tool, **Isolated** tool

**Filled Region** tool, **Trim/Extend to Corner** tool, **Rotate** tool

If you click on an item in a panel of the ribbon and a dialog box is invoked wherein you can set the properties to create/edit an object, then that item is also termed as **tool**, refer to Figure 1.

For example:

**Load Family** tool, **Beam** tool, **Wall** tool

**Structural Wall** tool, **Visibility/Graphics** tool

Figure 1 Tools in the ribbon

### Button

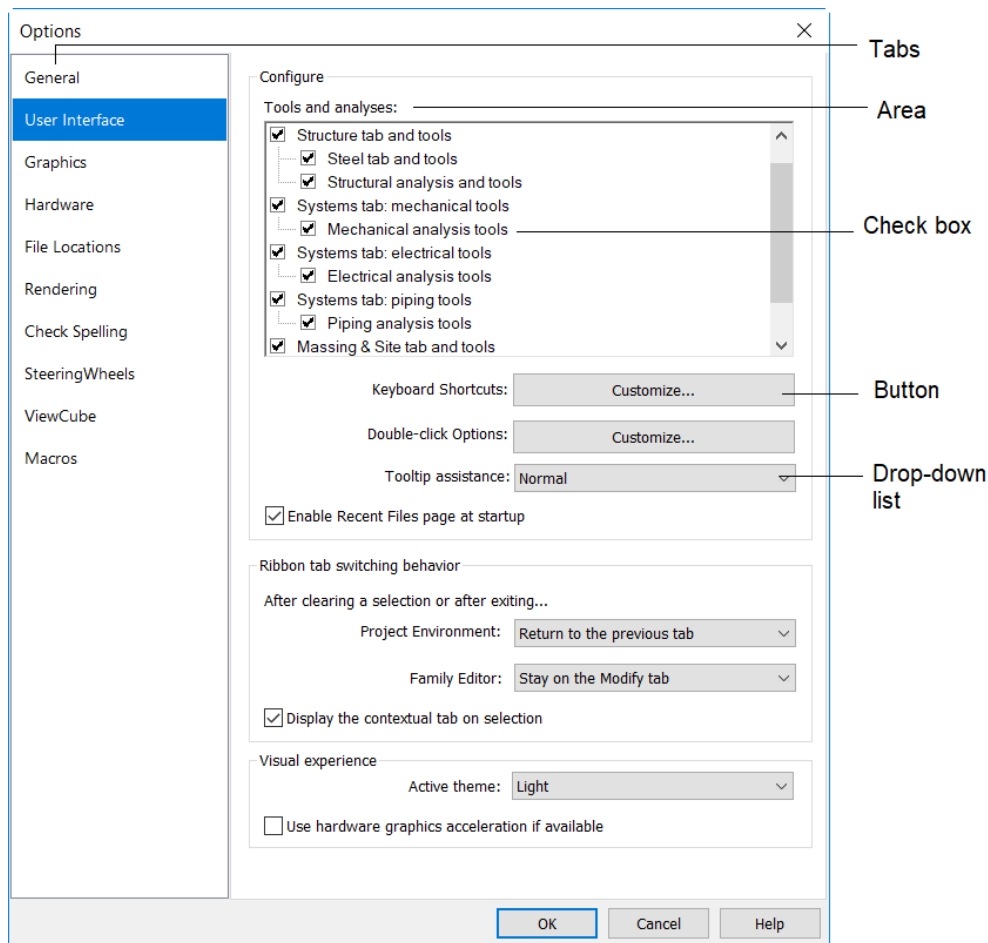

The item in a dialog box that has a 3d shape like a button is termed as **button**. For example, **OK** button, **Cancel** button, **Apply** button, and so on. If the item in a ribbon is used to exit a tool or a mode, it is also termed as button. For example, **Modify** button, **Finish Edit Mode** button, **Cancel Edit Mode** button, and so on; refer to Figure 2.

**Figure 2** Choosing the *Finish Edit Mode* button

## Dialog Box

In this textbook, different terms are used for referring to the components of a dialog box. Refer to Figure 3 for the terminology used.

**Figure 3** The components of a dialog box

### Drop-down

A drop-down is one in which a set of common tools are grouped together for creating an object or performing some action. You can identify a drop-down with a down arrow on it. These drop-downs are given a name based on the tools grouped in them. For example, **Wall** drop-down, **Component** drop-down, **Region** drop-down, and so on; refer to Figure 4.

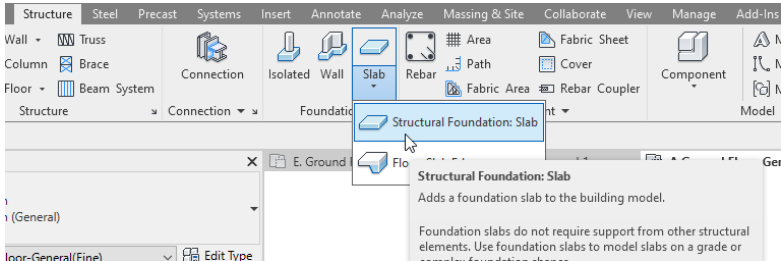

Figure 4 Choosing a tool from the drop-down

### Drop-down List

A drop-down list is the one in which a set of options are grouped together. You can set various parameters using these options. You can identify a drop-down list with a down arrow on it. For example, **Type Selector** drop-down list, **Units** drop-down list, and so on; refer to Figure 5.

### Options

Options are the items that are available in shortcut menus, drop-down lists, dialog boxes, drop-down lists, and so on. For example, choose the **Zoom In Region** option from the shortcut menu displayed on right-clicking in the drawing area; refer to Figure 6.

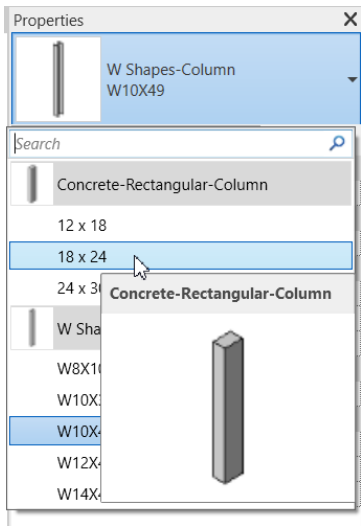

Figure 5 Selecting an option from the **Type Selector** drop-down list

Figure 6 Choosing an option from the shortcut menu

## Free Companion Website

It has been our constant endeavor to provide you the best textbooks and services at affordable price. In this endeavor, we have come out with a Free Companion website that will facilitate the process of teaching and learning of Autodesk Revit 2022 for Structure. If you purchase this textbook, you will get access to the files on the Companion website.

The resources available for the faculty and students in this website are as follows:

### Faculty Resources

- **Technical Support**

You can get online technical support by contacting *techsupport@cadcim.com*.

- **Instructor Guide**

Solutions to all review questions and exercises in the textbook are provided in this guide to help the faculty members test the skills of the students.

- **Revit Files**

The Revit files used in tutorials and exercises are available for free download.

### Student Resources

- **Technical Support**

You can get online technical support by contacting *techsupport@cadcim.com*.

- **Revit Files**

The Revit files (.rvt) used in tutorials and examples are available for free download.

- **Learning Resources**

Additional learning resources at *https://revitxperts.blogspot.com*

If you face any problem in accessing these files, please contact the publisher at *sales@cadcim.com* or the author at *stickoo@pnw.edu* or *tickoo525@gmail.com*.

### Video Courses

CADCIM offers video courses in CAD, CAE Simulation, BIM, Civil/GIS, and Animation domains on various e-Learning/Video platforms. To enroll for the video courses, please visit the CADCIM website using the following link: *https://www.cadcim.com/video-courses*.

### Stay Connected

You can now stay connected with us through Facebook and Twitter to get the latest information about our textbooks, videos, and teaching/learning resources. To stay informed of such updates, follow us on Facebook (*www.facebook.com/cadcim*) and Twitter (*@cadcimtech*). You can also subscribe to our You Tube channel (*www.youtube.com/cadcimtech*) to get the information about our latest video tutorials.
