

Table of Contents

Dedication	iii
Preface	xiii

Chapter 1: Introduction to AutoCAD Map 3D 2013

Introduction	1-2
Geospatial Analysis	1-2
Vector or Feature Data	1-2
Raster Data	1-3
Drawing Object Data	1-3
Survey Data	1-4
Industry Model Data	1-4
Layers	1-4
AutoCAD Layer	1-4
Vector or Feature Layer	1-4
Starting AutoCAD Map 3D 2013	1-5
Workspace	1-5
Planning and Analysis Workspace	1-6
Maintenance Workspace	1-7
2D Drafting Workspace	1-7
Switching Workspaces	1-7
AutoCAD Map 3D 2013 Interface <i>Enhanced</i>	1-8
Application Menu	1-9
Ribbon	1-10
Drawing Area	1-11
Drawing Status Bar	1-11
Command Line	1-13
Status Bar	1-13
Task Pane	1-17
Navigation Bar	1-18
AutoCAD Map 3D Dialog Boxes	1-19
AutoCAD Map 3D HELP	1-20
InfoCenter Bar	1-20
More Help	1-23
Abbreviations of the File Formats	1-24

Chapter 2: Getting Started with AutoCAD Map 3D 2013

Introduction	2-2
Starting a New Drawing File	2-2
Data Input Methods	2-3
Inputting Drawing Data by Opening an AutoCAD File	2-3
Loading Data by Using the Connect Tool	2-4

Loading Data by Using the Map Explorer Tab	2-10
Importing GCP Data by Using the Survey Tab	2-10
Importing an External File Format Data by Using the Map Import Tool	2-11
Data Output Methods ^{Enhanced}	2-13
Data Output by Using the Save As Option	2-13
Data Output by Using the Export Option	2-13
Data Output by Using the DWG Convert Option	2-14
Data Output by Using the Printing Tools	2-17
Data Output by Using the Publishing Option	2-25
Sending Files as Packages	2-27
Understanding the Concept of Sheet Sets	2-29
Creating a Sheet Set by Using an Example Sheet Set	2-29
Creating a Sheet Set by Using Existing Drawings	2-32
Tutorial 1 Using the Connect Tool- I	2-33
Tutorial 2 Using the Connect Tool - II	2-36
Tutorial 3 Using the eTransmit Tool	2-39
Tutorial 4 Loading Survey Data in the Data Store	2-42
Tutorial 5 Exporting Drawing File as SDF File	2-46
Self-Evaluation Test	2-50
Review Questions	2-51
Exercise 1	2-52
Exercise 2	2-52
Exercise 3	2-52

Chapter 3: Using Basic Tools and Coordinate Systems

Introduction	3-2
Using the Basic Tools	3-2
Using the Zoom Tool	3-2
Pan Tool	3-4
View Scale Tool	3-4
Using the Snap Function in Map 3D	3-5
Snapping Cursor (Using Snap Spacing)	3-5
Object Snap	3-8
Working in the Ortho Mode	3-10
Coordinate Reference system (CRS)	3-10
Creating a Coordinate Reference System	3-11
Assigning a Coordinate Reference System to Data	3-18
Using the Connect Tool to Assign a Coordinate System to a Dataset while Importing	3-20
User Coordinate Systems in AutoCAD	3-22
Moving the UCS Triad	3-22
Rotating the UCS Triad about the X Axis	3-23
Using a Named UCS for Drawings	3-23
Tutorial 1 Assigning GCS to Workspace	3-25
Tutorial 2 Creating a Coordinate Reference System	3-26
Tutorial 3 Assigning GCS while Loading Data	3-32
Self-Evaluation Test	3-34

Review Questions	3-35
Exercise 1	3-36

Chapter 4: Inserting Images and Creating the Feature Data

Introduction	4-2
Inserting a Raster Image	4-2
Inserting a Raster Image Using the Image Tool	4-3
Feature Data	4-5
Creating Feature Data Store	4-5
Creating a Feature Data	4-10
Creating the Point and Multipoint Feature Data	4-10
Creating the Line and MultiLine Feature Data	4-12
Creating the Polygon and MultiPolygon Feature Data	4-13
Enhancing Precision using COGO Input Tools	4-14
Using the Angle/Distance Routine	4-14
Using the Azimuth/Distance Routine	4-16
Using the Bearing/Bearing Routine	4-17
Using the Bearing/Distance Routine	4-18
Using the Deflection/Distance Routine	4-19
Using the Distance/Distance Routine	4-19
The Inverse Report Routine	4-20
Using the Orthogonal/Offset Routine	4-21
Editing Data in Feature Layer	4-22
Editing Feature Attribute	4-23
Editing the Feature Data Geometry	4-24
Tutorial 1 Creating Data Store and Feature Data	4-26
Tutorial 2 Creating SDF Feature Data Store	4-37
Tutorial 3 Editing Vector Layer and Data Table	4-51
Self-Evaluation Test	4-56
Review Questions	4-58
Exercise 1	4-59
Exercise 2	4-60

Chapter 5: Styling Layers and Using Queries to Filter Data

Introduction	5-2
Thematic Layers	5-2
Styling the Feature Data	5-2
Scale Ranges for Layer Default Area	5-3
Symbolization Style for Selected Scale Range Area	5-4
Using Filters to Query the Data	5-15
Using Filters for Searching Data	5-22
Tutorial 1 Styling the Feature Data	5-24
Tutorial 2 Querying the Feature Data	5-33
Self-Evaluation Test	5-37
Review Questions	5-38
Exercise 1	5-39

Chapter 6: Creating Object Data, and Attaching External Database and Drawings

Introduction	6-2
Object Data	6-2
Defining Object Data Table	6-2
Attaching Object Data to Existing Drawing Object	6-3
Attaching Object Data While Digitizing a Drawing Object	6-5
Editing the Object Data	6-8
Editing the Object Data Table	6-9
Detaching the Object Data Table	6-11
Attaching an External Database	6-11
Creating a Link between Map 3D Drawing and Database	6-11
Defining Link Templates	6-13
Linking Data to Objects	6-14
Attaching a Drawing File	6-18
Querying an Attached Drawing	6-19
Location Query Type	6-20
Property Query Type	6-23
Data Query Type	6-24
Creating a Query Using the Relational Operators	6-25
Specifying the Query Mode	6-25
Setting the Options for Query Output Data	6-28
Editing an Object in an Attached Drawing	6-37
Setting User Rights for Drawing	6-37
Tutorial 1 Creating Drawing Objects	6-38
Tutorial 2 Using the Location and Property Query Types	6-44
Self-Evaluation Test	6-52
Review Questions	6-53
Exercise 1	6-54
Exercise 2	6-54

Chapter 7: Classifying Objects and Working with Classified Objects

Introduction	7-2
Creating the Basic Environment for Object Classification	7-2
Assigning the Global Coordinate System	7-2
Specifying a Drawing File for the Object Classification	7-2
Drawing Object classification	7-2
Setting the User Privileges	7-3
Creating Object Classes	7-3
Specifying a Definition File	7-4
Defining the Parameters of an Object Class	7-5
Selecting Drawing Objects for Classification	7-10
Classifying Drawing Objects	7-13
Unclassifying Drawing Objects	7-13

Verifying the Details of Classified Data	7-14
Working with Classified Objects	7-14
Creating Objects by Using Object Classes	7-14
Editing an Existing Object Class	7-14
Creating a Map File by Using Object Classes	7-14
Displaying and Sharing the Metadata File	7-15
Including and Sharing the Metadata File	7-15
Displaying the Metadata Information	7-18
Tutorial 1 Classifying Drawing Objects	7-20
Tutorial 2 Creating Objects from Object Class	7-28
Tutorial 3 Creating the Metadata File	7-31
Self-Evaluation Test	7-33
Review Questions	7-34
Exercise 1	7-35
Exercise 2	7-36

Chapter 8: Performing Drawing Cleanup and Working with Topologies

Introduction	8-2
Drawing Cleanup	8-2
Preparing the Drawing Data for Cleanup	8-2
Applying Cleanup to Drawing Data	8-2
Select Objects Page	8-3
Select Actions Page	8-5
Cleanup Methods Page	8-8
Error Markers Page	8-8
Performing Drawing Cleanup	8-9
Topology	8-10
Creating a Topology	8-11
Sliver Polygons	8-16
Topology Query	8-17
Defining a Topology Query	8-17
Object Thematic Query	8-19
Topology Thematic Query	8-21
Tutorial 1 Performing Drawing Cleanup	8-22
Tutorial 2 Creating Topology from the Drawing Objects	8-28
Tutorial 3 Performing the Topology Query	8-31
Self-Evaluation Test	8-34
Review Questions	8-35
Exercise 1	8-36

Chapter 9: Data Analysis

Introduction	9-2
Object Data Analysis	9-2
Line & Arc Information Tool	9-2

Angle Information Tool	9-2
Geodetic Distance Tool	9-3
Coordinate Track Tool	9-4
Continuous Distance Tool	9-6
Add Distances Tool	9-7
Measure Tool	9-9
List Slope Tool	9-10
Feature Data Analysis	9-11
Feature Buffer Tool	9-11
Feature Overlay Tool	9-13
Topological Data Analysis	9-17
Show Topology Tool	9-18
Show Geometry Tool	9-18
Object Overlay Tool	9-18
Dissolve Tool	9-23
Object Buffer Tool	9-25
Network Analysis Tool	9-26
Create Closed Polylines Tool	9-29
Tutorial 1 Using the Track Coordinate System Tool	9-30
Tutorial 2 Using the Feature Overlay Tool	9-35
Tutorial 3 Using the Network Analysis Tool	9-38
Self-Evaluation Test	9-42
Review Questions	9-43
Exercise 1	9-44
Exercise 2	9-44

Chapter 10: Working with Different Types of Data

Introduction	10-2
Point Cloud Data	10-2
Point Cloud Manager	10-2
Creating a 3D Surface from the Point Cloud Data	10-6
Creating a 3D Surface from the Field Survey Data	10-8
Viewing and Analyzing 3D Surfaces	10-11
Styling a Raster Layer	10-11
Creating a Contour Layer	10-14
Setting the Hillshade Parameters	10-15
Vertical Exaggeration	10-16
Attribute Data	10-16
Creating a Bulk Copy	10-16
Managing the Attributes in a Vector Layer	10-18
Industry Model	10-23
Creating the Industry Model Data or Topobase	10-24
Creating Drawings in Industry Model	10-25
Converting Data to Industry Model ^{New}	10-26
Tutorial 1 Creating a 3D Surface from the LiDAR Data	10-27
Tutorial 2 Creating Contours from the Point Data	10-31

Tutorial 3 Creating Bulk Copy, Join, and Calculation	10-37
Self-Evaluation Test	10-46
Review Questions	10-47
Exercise 1	10-48
Exercise 2	10-48

Chapter 11: Editing a Map and Creating a Map Book

Introduction	11-2
Map Editing Tools	11-2
Rubber Sheet Tool	11-2
Transform Tool	11-3
Boundary Break Tool	11-4
Boundary Trim Tool	11-7
Map Layout and Map Elements <i>Enhanced</i>	11-8
Preparing a Map Layout Sheet	11-9
Enhanced Attribute Editor for Editing the Layout Template	11-12
Map book	11-13
Creating a New Map Book	11-13
Creating a Map Book from Existing Templates	11-24
Creating a Map Book Using the Plot Settings	11-24
Tutorial 1 Performing the Rubber Sheeting	11-25
Tutorial 2 Performing the Boundary Break	11-27
Tutorial 3 Creating a Map Layout	11-29
Tutorial 4 Creating a Map Book	11-36
Self-Evaluation Test	11-41
Review Questions	11-42
Exercise 1	11-43
Exercise 2	11-43
Exercise 3	11-44
